PROFESSIONAL SUMMARY

Full Stack JavaScript Developer and SDE Intern at BRMH.ai with experience building 3 production-ready web applications and 1 published npm package. Proficient in React.js, Node.js, TypeScript, Express.js, MongoDB, PostgreSQL, SQLite, and Redux Toolkit. Skilled in RESTful API design, real-time systems (Socket.io), AI integration (Gemini AI, LangGraph), security hardening, and payment gateway integration.

TECHNICAL SKILLS

Frontend:	React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Tailwind CSS, GSAP, Framer Motion
State Management:	Redux Toolkit, Context API
Backend:	Node.js, Express.js, NestJS (learning), REST API Design, JWT Authentication, Google OAuth, bcryptjs, Helmet.js
AI / Real-time:	Gemini AI, LangGraph, LangChain, Mistral AI, Cohere AI, GitHub API, MediaPipe, Socket.io
Databases:	MongoDB, MongoDB Atlas, Redis, PostgreSQL, SQLite
DevOps / Tools:	Docker (learning), Kubernetes (learning), Git, GitHub, Postman, Razorpay, ImageKit, Vercel, Render
Analytics:	Google Analytics 4 (GA4), Google Ads

PROJECTS & PRODUCTS

traceSketch — API Tracing, Replay & Collaboration Tool | **Published npm Package** — npmjs.com/package/tracesketch

Node.js · TypeScript · SQLite · React.js · Socket.io · MongoDB Atlas · Express.js · npm workspaces · CLI

- Designed, built, and published a privacy-first developer tool (npm install tracesketch) that captures API traces, replays failed requests, and auto-converts production incidents into regression tests — all stored locally in SQLite with zero mandatory cloud dependency.
- Built a 2-developer real-time collaboration feature: Socket.io rooms, WhatsApp-style messaging, 4-char alphanumeric group codes, 6-hour TTL relay server (Express + MongoDB Atlas on Render) — trace data stays local, only group messages use the cloud relay.
- Engineered TypeScript monorepo via npm workspaces (SDK + Collector + Dashboard + CLI); npx tracesketch start launches the full stack in one command; implemented SSRF remediation (hostname/IP validation, DNS rebinding protection, redirect blocking) across Replay and Regression features.

RepoLens AI — AI-Powered GitHub Repository Analyzer | **FlowZint AI Hackathon, Unstop** — repolens-ai-seven.vercel.app

React.js · Redux Toolkit · Node.js · Express.js · MongoDB · Gemini 2.5 Flash · Mistral · GitHub API · JWT

- Built full-stack AI platform analysing any GitHub repository via GitHub API; integrated 2 AI models (Gemini 2.5 Flash, Mistral) to auto-generate interview questions, recruiter scoring across 3 dimensions, and README documentation.
- Engineered modular AI service architecture with Redux Toolkit frontend state, JWT auth, and 'Roast Mode' feature for constructive repo feedback; deployed on Vercel and Render.

Highkeytess — Full Stack E-Commerce Platform — snitch-indol.vercel.app

React.js · Redux Toolkit · Node.js · Express.js · MongoDB · JWT · Google OAuth · Razorpay · Helmet.js · ImageKit

- Built full-stack e-commerce platform with 2 role-based dashboards (Buyer and Seller), Google OAuth, variant management, and Razorpay payment gateway integration.
- Implemented Add-to-Cart using MongoDB Aggregation Pipeline for real-time price calculation; secured backend with Helmet.js (CSP, XSS, clickjacking); ImageKit for optimised image delivery.

WORK EXPERIENCE

Software Development Engineer Intern — BRMH.ai — 2026 – Present

- Contributing to full-stack feature development using MERN stack and PostgreSQL; building and maintaining backend REST APIs, database schemas, and server-side logic in a production environment.
- Integrating Google Analytics 4 (GA4) and Google Ads for marketing analytics; actively learning Docker and Kubernetes for containerisation and deployment workflows.

Full Stack Developer — Self-Directed Projects & Products — 2025 – 2026

- Independently built and shipped 3 full-stack web applications and 1 published npm package — covering REST API design, real-time systems, AI integration, security hardening, and cloud deployment.

EDUCATION

Bachelor of Science (B.Sc) in Information Technology — Ranchi University — Expected 2028

Intermediate (Science) — Marwari College, Ranchi — 2022 – 2024

CERTIFICATIONS

Responsive Web Design — freeCodeCamp (2026) · Generative AI and Prompt Engineering — IBM (2025) · Generative AI for All — Microsoft (2025)
