## PROFESSIONAL SUMMARY

Full Stack JavaScript Developer with hands-on experience building and deploying 4 production-ready web applications using React.js, Node.js, Express.js, MongoDB, and Redux Toolkit. Skilled in RESTful API design, JWT authentication, AI integration (Gemini AI, LangGraph, MediaPipe), payment gateway integration, and real-time features — seeking a full-stack or frontend role focused on scalable, user-facing products.

## TECHNICAL SKILLS

|                   |                                                                                                                |
|-------------------|----------------------------------------------------------------------------------------------------------------|
| Frontend:         | React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Tailwind CSS, GSAP, Framer Motion                  |
| State Management: | Redux Toolkit, Context API                                                                                     |
| Backend:          | Node.js, Express.js, NestJS (learning), REST API Design, JWT Authentication, Google OAuth, bcryptjs, Helmet.js |
| AI / Real-time:   | Gemini AI, LangGraph, LangChain, Mistral AI, Cohere AI, GitHub API, MediaPipe, Socket.io                       |
| Databases:        | MongoDB, Redis, PostgreSQL                                                                                     |
| Tools:            | Git, GitHub, Postman, Razorpay, ImageKit, VS Code, Vercel, Render                                              |

## PROJECTS

### RepoLens AI — AI-Powered GitHub Repository Analyzer | FlowZint AI Hackathon, Unstop

repolens-ai-seven.vercel.app

React.js · Redux Toolkit · Node.js · Express.js · MongoDB · Gemini 2.5 Flash · Mistral · GitHub API · JWT

- Built a full-stack AI platform analysing any GitHub repository via the GitHub API, extracting 4+ data points (metadata, file structure, README, config files) to generate structured insights.
- Integrated 2 AI models (Gemini 2.5 Flash, Mistral) to auto-generate interview questions, recruiter scoring across 3 dimensions (code quality, scalability, documentation), and README generation.
- Engineered modular architecture separating AI services, API layer, and Redux Toolkit frontend state; JWT-secured auth with 'Roast Mode' feature; deployed on Vercel and Render.

### Highkeytess — Full Stack E-Commerce Platform

snitch-indol.vercel.app

React.js · Redux Toolkit · Node.js · Express.js · MongoDB · JWT · Google OAuth · Razorpay · Helmet.js · ImageKit · Tailwind CSS

- Built a full-stack e-commerce platform with 2 role-based dashboards (Buyer and Seller), Google OAuth login, protected routes, and JWT-based session management.
- Engineered Seller dashboard with product listing, variant management (size, colour, stock), product search, and edit functionality; integrated Razorpay payment gateway for end-to-end order processing.
- Implemented Add-to-Cart using MongoDB Aggregation Pipeline for real-time price calculation and variant-aware cart logic; secured backend with Helmet.js (CSP, XSS, clickjacking); used ImageKit for optimised image storage and delivery.

### Recall AI — AI-Powered Content Organizer

recall-ai-ashen.vercel.app

React.js · Node.js · Express.js · MongoDB · LangGraph · Mistral AI · Cohere AI · JWT

- Built an AI platform that automatically organises saved URLs into intelligent libraries using semantic content analysis powered by a LangGraph multi-agent workflow.
- Developed 3-agent pipeline (Inspector AI, Librarian AI, Metadata AI) for content classification, summarisation, and tag generation; delivered end-to-end within an 8-hour hackathon.
- Designed backend APIs for URL processing, AI orchestration, and MongoDB storage with Mistral AI and Cohere AI integration.

## WORK EXPERIENCE

### Full Stack Developer — Self-Directed Projects

2025 – Present

- Independently designed, developed, and deployed 4 full-stack web applications — UI/UX, REST API design, database modelling, payment integration, and cloud deployment on Vercel and Render.

### Web Developer Intern — InAmigos Foundation

May 2026 (1 month)

- Contributed to frontend web development tasks and feature implementation within a team-based environment.
- Completed assigned development work across the internship duration; awarded Internship Completion Certificate.

## EDUCATION

### Bachelor of Science (B.Sc) in Information Technology — Ranchi University

Expected 2028

Intermediate (Science) — Marwari College, Ranchi

2022 – 2024

## CERTIFICATIONS

Responsive Web Design — freeCodeCamp (2026) · Generative AI and Prompt Engineering — IBM (2025) · Generative AI for All — Microsoft (2025)
